

Senior developer (Java / Kotlin / Full stack)

We focus on the Java ecosystem and aspire to be thought leaders in our niche. Do you want to join us in our mission to build better software, faster? Do you like to share knowledge, get inspiration from your colleagues and are you looking for a company where fun and knowledge sharing is at the center? We would love to hear from you and see how you fit our profile below.

Your profile

You are a senior developer driven by ambition. You are always curious and always want to learn more. During your daily work as a developer/consultant with one of our customers, but also at conferences and training. You are familiar with the Java ecosystem and see software development as a craft that is never perfect. You enjoy working with a team who sees it the same way.

Why OpenValue?

- A small, dynamic team built by developers for developers where talent, passion, enthusiasm, initiative, and commitment are strongly encouraged, valued and rewarded
- An environment where everyone knows each other personally and where quality, fun and knowledge sharing go hand in hand
- Working together with amazing developers, architects, Java champions, Google Developer Experts and partners like AWS, Azul and JetBrains
- Work on innovative and challenging projects and use the latest technologies at leading clients (from startups to enterprises)
- A coaching program with personal conversations about personal development and, above all, your job satisfaction
- A huge amount of challenge and all the space and resources to further develop your knowledge and skills (presenting, blogs, training and much more)
- A self-managing and social working environment with a good balance between work and private life and a lot of space for activities outside work for the customer
- An active connection to various JUGs and developer communities - we look forward to introducing you to the brightest minds in the industry!

Who are we looking for

We're looking for candidates who bring:

- A bachelor's or master's degree in computer science/engineering or relevant experience (at least 5 years) in the field of software engineering
- 5+ years of experience with Java or Kotlin and the JVM ecosystem
- Preferably, experience with:
 - Spring, Quarkus or another JVM (microservice) framework
 - CI, CD & DevOps (test automation, automated deployments, monitoring)
 - Cloud infrastructure (AWS / GCP, Docker, Kubernetes)
 - Relational and NoSQL databases
 - Event driven architectures (Kafka, Redis, Vert.x)
 - Front-end development (Angular / React / Vue)
- You're living near one of our offices (see <https://openvalue.eu/contact>) and speak the local language
- You're eager to learn and share knowledge; experience with public speaking (meetups, conferences) or as a trainer is a plus
- You're a team player and an effective communicator

What we offer

- Competitive compensation (including profit sharing) that matches your skills, experience and ambition
- Immediate contract for an indefinite period
- Key roles in innovative projects in the JVM ecosystem, architecting and building new software
- Working conditions tailored to your situation: flexible working hours, ability to work from home (in consultation with the project you work on – most projects are on site at least one day per week)
- A small team of ambitious colleagues who love to work with modern technology and share their knowledge
- A personal development plan to become an expert in new technologies
- A unique concept of autonomous teams per city, working together in an international context (combining the best of both worlds: both the benefits of a small company and of a big company)
- Next to innovative projects we actively share knowledge through a variety of training and offer you the chance to become a trainer
- Fun events (ski trips, hackathons and more)

Let's talk!

Leave your contact details via <https://openvalue.eu/career> and we'll get back to you as soon as possible.
